With this changes I feel I had better send you these and let you decide to discard. I've not had time to read them and think I should mail when I get for Lil. The Post has a long Vesco-GOP-contributions story today. Instead of copying I'm getting a copy. Got to DC in a.m. so probably won't mail until Friday, but you'll get in case is supplements NYT story. The DT thing has been much on my mind because she keeps feeding the credible and the kind of thing she could not likely make up. Like taped intercepts include Volz' vpice. He had no connection with "probe" and there was no reason to know of his existence. The call she referred to of mine was from Alcock's.
